

Excerpt chart for an ECO tracker, on Yahoo Finance, April 8, 2026

<https://finance.yahoo.com/quote/PBW>

[Note: while this shows a Gain for Past 1 year / or 12 months of +143%, it is capturing intentionally by this notable date, a brief deep-low occurring in prior year. Hence amplifies / exacerbates 12 Month gain; after tariffs were reversed; markets jumped upwards from April 9th of 2025. We emphasize as always, that the clean energy theme is highly volatile: it can & does fall down hard, often more than broad markets]:
